

Nikon NE-101 and NE-100 7" & 10" Theodolites

Nikon Electronic Theodolites feature exceptional reliability and ease of use for general construction needs.

Affordable and featuring Nikon quality, these instruments are ideal for concrete form alignment, anchor bolt positioning, steel column erection and more!!! The theodolites enable a number of positioning techniques: 90 degree layout, checking angles, alignment and plumb, as well as short range grade work and leveling.

Features

- Large display and keyboard for easy use
- Angle accuracy of 7" NE-101 (Displays to 5/10"), 10" NE-100 (Displays to 10/20")
- 22 hour battery life on AA Alkalines
- Superior Nikon optics
- 30X Telescope/Stadia
- Water and Dust resistant
- 2.2X Optical Plummet

Trimble DiNi Digital Levels

The Trimble DiNi Digital Level is a digital height measurement sensor designed for any job site where fast and accurate height determination is required. Use the Trimble DiNi for applications such as precise leveling of flat and sloping surfaces, establishing the vertical component of grade and grade profiles, subsidence monitoring and establishing the vertical component of control networks.

KEY FEATURES:

- Determine accurate height information 60% faster than with automatic leveling
- Eliminate errors and reduce rework with digital readings
- Transfer data to the office easily
- Measure to a field of just 30cm

The easy to use and accurate Trimble DiNi offers numerous features to maximize your productivity in the field. Available in two models – DiNi 0.3 mm per km or DiNi 0.7 mm per km. For more information on the DiNi Digital Levels please call and request.

Comes with a selection of bar code rods to choose from too.
